Technical skills

- Backend technologies (Node.js, Express.js, REST APIs)
- Computer security fundamentals
- Database management (MySQL, phpMyAdmin, MongoDB)
- AI and machine learning development
- Python programming
- Java programming
- Web development (HTML, CSS, JavaScript)
- Basic networking

Work tools

- Visual Studio Code
- Kali Linux
- Cisco Packet Tracer
- Android Studio
- IntelliJ

AI-assisted development

- Claude, ChatGPT, Google Gemini, Copilot
- AI-assisted code generation, debugging, and reviewing
- Prompt engineering

Profile summary

Information Technology student majoring in Computer Security, with hands-on experience building backend applications using Node.js, Express.js, PHP, and MongoDB. Completed coursework in ethical hacking and computer forensics, and holds the Appkademiya Certified Cybersecurity Professional credential. Seeking an on-site internship or entry-level role in backend development or application security.

Education

Bachelor of Science in Information Technology, major in Computer Security

PHINMA University of Pangasinan, 2023 to present

Relevant coursework: Computer Forensics, Ethical Hacking

Certification

Certified Cybersecurity Professional (CCP)

Appkademiya, issued October 19, 2026

Projects

HabiTrash: A Smart Waste Management System with AI and IoT Monitoring

Capstone project, 2025 to 2026. React.js, Node.js, Python, TensorFlow, MongoDB, ESP32, Linux OS

Developed a smart waste management system that integrates AI-based waste classification and IoT-enabled smart bin monitoring to improve waste segregation, collection monitoring, and operational efficiency.

WorkConnect

Academic team project, 2025. Backend contributor. Node.js, Express.js, MongoDB

Web-based job platform connecting small and mid-sized companies with job seekers.

TaskConnect

Academic team project, 2025. Backend contributor. Kotlin, Android Studio, PHP

Android application for hiring workers for short, small-scale tasks.

Find Me

Academic project, 2024. Unity

3D horror mobile game built in Unity, in which players navigate a maze, avoid threats, and collect letters to form words.

ByteBuddy

Academic project, 2024. HTML, CSS, JavaScript

Web platform where users submit support tickets and schedule appointments with technical administrators, centralizing communication and speeding up issue resolution.

TurboTyper

Academic project, 2024. Java Swing

Timed typing game with difficulty levels that set word complexity and time limits.

Dice Game

Academic project, 2023. Python, Pygame, Tkinter

Dice-rolling game featuring a selection of dice designs.
